

Points of Difference

All of our installation projects are managed by Site Supervisors. These team leaders are industry experts, certified in-house and externally with:

- Senior First Aid Certificate (St Johns certificate equivalent)
- Forklift & Scissor Lift Licences
- General construction industry safety induction certificates (State specific)
- Company accreditation of knowledge in technical aspects of industry products
- In-house training in team leadership and project management
- Certificate 4 in Frontline Business Management

Aus-Rack Installations designs & utilises certified lifting equipment for efficient and safe installations. Our machinery & equipment inventory includes industrial scissor lifts and forklifts which are regularly inspected, tested and serviced to ensure safe operation on sites Australia wide.

All Aus-Rack Installations' works are completed within the finished tolerances prescribed by Tables 3 & 4 of Section 7 of AS4084-1993 "Steel Storage Racking".
